Blockchain & Smart Contracts Course: Open-Ended Questionnaire MANAGMENTE ENGINEERING

Dear Students,

As part of the "Blockchain and Smart Contracts" course, I would like to gather your thoughts, experiences, and knowledge on blockchain technology. Please answer the following questions as comprehensively as possible. Your feedback will help shape future discussions and course content.

1. What is your current understanding of blockchain technology?

(Feel free to include any definitions, examples, or experiences you may have encountered.)

2. How do you perceive the potential of blockchain technology in transforming industries?

(Consider fields such as finance, healthcare, supply chain, or others you are interested in.)

3. Have you ever used any blockchain-based applications or platforms (e.g., cryptocurrencies, NFTs, decentralized applications)? If yes, could you briefly describe your experience?

4. What are the main advantages and disadvantages of blockchain technology, in your opinion?

(Feel free to mention technical aspects, ethical concerns, or social impact.)

5. How familiar are you with the concept of smart contracts?

(Can you explain what smart contracts are and how they might be used in different industries?)

6. What challenges or barriers do you foresee in the adoption of blockchain technologies on a larger scale?

(You might consider technical, regulatory, or societal factors.)

7. In your opinion, how important is transparency, decentralization, and security in modern business ecosystems?

(How do you think blockchain technology addresses or fails to address these needs?)

8. Do you think blockchain will have a long-term impact on how we manage data and transactions? Why or why not?

9. How would you describe your level of confidence in discussing blockchain technology with peers or industry professionals?

(What could help you feel more confident?)
